Inspection and Test Plan

Client: AIAL	Subcontractor: Mckenzie & Parma	Work Area: Cargo Super Highway, Head Of Stand Road		
Project Name: Domestic Jet Terminal	Job No: HA0423	Subcontractor Representative: Luigi Maranan		

1. ITP Element: Utility Services Ducting – High Voltage, Low Voltage and Communication systems

Inspection and Test Plan

- Inspect (I) To visually examine or measure an item or contracted work operation to verify its conformance to predetermined quality requirements
- Review (R) To examine any form of documentation to establish its acceptability against specified requirements
- Surveillance (S) To observe in-process activities to the degree necessary to be assured that they comply with the established criteria
- Test (T) To subject a component, structure, or system to a controlled set of physical, chemical, environmental or operational conditions to determine or verify its capability to meet specified requirements
- Witness (W) To watch over, observe or visually examine a specific work operation or test performed by others under Contractor supervision
- Monitor (M) General oversight of work in progress with no need to document formally.
- Submission (Sub) Submission of a document

Note: The Engineer shall be provided a minimum of two (2) working days' notice ahead of a requested inspection
